FevercheckerPRO™ is the most advanced data driven human temperature checking system. Specifically designed for health management in the Covid era, it is the fastest, least intrusive, lowest cost and most convenient method of checking for a fever which is the primary indicator for Covid-19 and other serious illnesses. The data from our systems deliver real-time alerts and alarms whilst incorporating live monitoring and analysis dashboards for continuous 24/7, 365 protection. **Feverchecker**PRO™ data and metrics help facilitate an organisations' duty of care and accountability to complement and enhance management and Health and Safety policies.
